

Settings for Recruitment through Prolific

Study name:

Study of Coronavirus (COVID-19) Perceptions

Description:

We are inviting you to participate in a research study on perceptions of the current coronavirus (COVID-19) outbreak. If you decide to participate in this study, you will be asked to:

- * respond to several survey questions and
- * read some brief information about the coronavirus.

This study may help inform experts considering how to best respond to the coronavirus outbreak.

Results from this study will be shared with others, but your identity will not be associated with your responses. Specifically, after deleting any information (Prolific IDs) linking individuals to responses, the anonymous survey response data will be shared with others.

If you have any questions about this research project, please feel free to contact Dr. Nathan Favero at 303-269-1959 or favero@american.edu. Questions or concerns about your rights as a research participant should be directed to the Institutional Review Board for Protection of Human Subjects in Research (IRB) at American University at 202-885-3447 or by email at irb@american.edu.

Who will see your study?

Custom prescreening selected: restricted to "Current Country of Residence" being "United States" (Participants were asked the following question: In what country do you currently reside?)

Which devices should participants use to take your study?

All options (mobile, tablet, desktop) were selected.

How many participants are you looking to recruit?

1500

How long do you estimate it will take each participant to complete your study?

5 minutes

How much do you want to pay them?

\$0.55

```

IC Study of Coronavirus (COVID-19) Perceptions We are inviting you to participate in a research study on perceptions of the current coronavirus (COVID-19) outbreak. If you decide to participate in this study, you will be asked to respond to several survey questions and to read some brief information about the coronavirus. Completing this survey should take about **5 minutes**. If you finish the survey with valid responses, you will receive **\$0.55**. **Your responses are confidential**. There is always some risk that others will intercept your responses when you provide information on the Internet, but we will employ standard measures to ensure confidentiality. Results from this study will be shared with others, but your identity will not be associated with your responses. Specifically, we will destroy any information (Prolific IDs) linking individuals to responses. After deleting these individual identifiers, the anonymous survey response data will be shared with others. ***Your involvement in the study is voluntary, and you may choose not to participate or to stop at any time.*** The results of this study may help inform experts considering how to best respond to the coronavirus outbreak. We do not anticipate that your participation will result in any risks or discomforts, but you may skip any questions you do not want to answer. If you have any questions about this research project, please feel free to contact Dr. Nathan Favero at 303-269-1959 or favero@american.edu. Questions or concerns about your rights as a research participant should be directed to the Institutional Review Board for Protection of Human Subjects in Research (IRB) at American University at 202-885-3447 or by email at irb@american.edu. By completing the following survey, you are agreeing to participate in this research project. Participants must be 18 years of age or older. If you wish, please feel free to print and keep a copy of this page for your records. Thank you for participating in this study. Dr. Nathan Favero Principal Investigator Assistant Professor, Department of Public Administration & Policy School of Public Affairs, American University 303-269-1959 favero@american.edu

vignette0

The coronavirus (COVID-19) situation is constantly changing, and we are getting new information every day. Public health officials don't yet know exactly how long it will take to get the situation under control. Think for a moment about how your daily life is being affected by the disease outbreak.

We know that COVID-19 is spreading rapidly. It is true that many people survive the illness. But people with COVID-19 can start spreading the virus days before they realize they have it.

maxweeks0 What is the **longest amount of time** you could see yourself staying at home as much as possible and avoiding all social contact (i.e., adhering to so-called "social distancing")?

End of Block: C
